SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with hands-on experience in full-stack development. Proficient in designing and deploying end-to-end web applications, integrating frontend interfaces with robust backend systems. Skilled in building scalable applications and implementing machine learning solutions with a strong focus on performance tuning, code efficiency, and system optimization.

WORK EXPERIENCE

Edunet Foundation

Jun 2024 - Jul 2024

Front-End Development Intern

[Link](#)

- Developed a fully responsive personal portfolio site using HTML, CSS, and JavaScript, optimizing for performance and cross-device compatibility.
- Designed dynamic user interface with animated scrolling, intuitive navigation, and structured layout for showcasing projects and skills.
- Emphasized UI/UX principles to ensure accessibility, interactivity, and maintainability.

PROJECTS

Social Media Platform with AI Content Moderation – MERN Stack

[Link](#)

- Built a full-stack social media platform with user profiles, text and image posting, and an interactive feed, integrated automated content moderation using the OpenAI Moderation API to flag inappropriate content, enabled media uploads via Cloudinary, and implemented moderation logs with an admin dashboard.

Heart-Attack Risk Prediction – Machine Learning, Healthcare Analytics, Python

[Link](#)

- Built an ML-based system to predict heart attack risk using patient health data, with data preprocessing, feature selection, and classification models. Evaluated performance using accuracy and ROC-AUC for reliable healthcare insights.

Clothing E-Commerce Website - React Js, json server

[Link](#)

- Developed a responsive e-commerce website with user authentication, product catalog, shopping cart, and admin dashboard using React JS and a fake JSON server for backend functionality.

Resume Parser and Job Recommendation System - Python, TF-IDF, NLP Techniques

[Link](#)

- Developed a distributed NLP-based resume parsing system for concurrent processing, achieving 85% accuracy in data extraction and implementing TF-IDF vectorization for job-candidate matching.

EDUCATION

2022 - 2026	B.Tech (CSE) at SRM University AP	(CGPA: 8.20)
2020 - 2022	Class 12th at Sri Chaitanya Junior College	(836/1000)
2019 - 2020	Class 10th at Sri Chaitanya School	(600/600)

SKILLS

Programming Languages	C, C++, Java, Python, C#, JavaScript
Machine Learning & AI	NLP (TF-IDF), Data Preprocessing, Model Evaluation, Scikit-learn, Pandas, NumPy, TensorFlow
Web Development	React.js, Node.js, Express.js, HTML, CSS, RESTful APIs
Databases	MongoDB, SQL
Tools & Technologies	Git, GitHub, VS Code, Postman, Figma, Ubuntu, Vercel, Render, MATLAB

CERTIFICATIONS

- The Joy of Computing using Python by **Swayam NPTEL**
- Associate Developer by **MongoDB**
- Introduction to SQL by **Sololearn**
