SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with strong foundations in Data Structures, Algorithms, OOP, and Database Systems. Experienced in building scalable full-stack applications integrated with predictive models and AI-driven automation. Passionate about designing end-to-end systems focused on performance, clean architecture, and real-world impact.

WORK EXPERIENCE

AI/ML Intern – PrognosAI — Infosys Springboard

Feb 2026 – Apr 2026

- Built and deployed an LSTM-based predictive maintenance system using the NASA CMAPSS dataset to predict Remaining Useful Life (RUL).
- Incorporated advanced preprocessing, feature engineering, and model comparison (LSTM vs GRU) for robust performance.
- Developed a Streamlit dashboard for real-time decision support and visualization of predicted RUL trends.

Front-End Developer Intern — Edunet Foundation

Jun 2024 – Jul 2024

- Developed and deployed a fully responsive personal portfolio website using HTML, CSS, and JavaScript with interactive UI components and smooth animated scrolling.
- Structured project sections to effectively showcase technical skills across multiple devices and screen sizes.

PROJECTS

MediAI – AI Healthcare Platform – FastAPI, React, RAG, LLMs

[Link](#)

- Built a full-stack healthcare platform with FastAPI, React, MongoDB, Redis, JWT auth, and Google OAuth, delivering role-based dashboards and secure workflows for patients, doctors, and admins.
- Developed AI-assisted medical features including symptom chat, FAISS/LangChain-based RAG retrieval over medical documents, and a multimodal image diagnosis pipeline using EfficientNet and MedMNIST models to generate structured treatment hints and specialist guidance.

Social Media Platform with AI Content Moderation – MERN Stack

[Link](#)

- Built a full-stack MERN social media platform with user profiles, text and image posting, and an interactive feed.
- Integrated automated content moderation via OpenAI Moderation API, media uploads via Cloudinary, and an admin dashboard with moderation logs.

Heart-Attack Risk Prediction – Machine Learning, Healthcare Analytics, Python

[Link](#)

- Trained and evaluated KNN and a 4-layer ANN on clinical patient data using feature selection and StandardScaler.
- Achieved 87.12% test accuracy and ROC-AUC of 0.85, reducing false negatives for improved early risk detection.

SKILLS

Programming Languages	C, C++, Java, Python, JavaScript
Machine Learning & AI	Scikit-learn, TensorFlow, Pandas, NumPy
Web Development	React.js, Node.js, Express.js, FastAPI, HTML, CSS
Databases	MongoDB, SQL, PostgreSQL
Tools & Technologies	Git, GitHub, VS Code, Vercel, Render, Streamlit

EDUCATION

2022 - 2026	B.Tech in Computer Science at SRM University AP	(CGPA: 8.34)
2020 - 2022	Class 12th at Sri Chaitanya Junior College	(83.6%)
2019 - 2020	Class 10th at Sri Chaitanya School	(GPA: 10.00)

CERTIFICATIONS

Oracle Certified Professional: Java SE 17 Developer — Oracle
Core Java SE language features, OOP, concurrency, and module system.

Associate Certified Developer — MongoDB
MongoDB data modeling, CRUD operations, aggregation, and indexing.

The Joy of Computing Using Python — Swayam NPTEL
Python programming fundamentals and computational thinking.

React (Basic) Certificate — HackerRank
React component fundamentals, hooks, and state management.
